Description

The 19-inch TMC190 touchscreen is distributed in Switzerland by DYNATIME SA for professional and industrial applications. It combines a resolution of 1280 x 1024 pixels and a brightness of 250 cd/m².

This touchscreen is mounted on a desk or fixed to the wall thanks to its VESA mount. Robust and easy to install, it is suitable for reception desks, retail outlets and industrial environments.

Typical applications

- Retail outlets and reception desks
- Interactive display and signage
- Operator positions in the workshop
- Meeting and training rooms

Versions and options
