Ceramic kiln programmer ATR902

Portable programmer with multipole connector
For ceramic, glass and laboratory ovens: 15 programs, 18 segments

KEY FEATURES

- 15 programs in 18 segments
- Simple reading of the cycle
- Direct connection to the oven
- Universal nutrition

Description

The Pixsys ATR902 is a portable temperature programmer connected to the oven via a multipole connector. It is intended for ceramists, glassmakers, workshops and laboratories that need to reproduce cooking curves precisely.

15 programs in 18 segments

Each program sequences up to 18 segments of ascent, descent, or descent. The biscuit, enamel, or fusing curves are memorized once and are repeated exactly.

Simple reading of the cycle

The dual display and bargraph indicate the temperature, the setpoint and the progress of the cycle. Programming remains intuitive, even for an occasional user.

Direct connection to the oven

The 7-pole connector plugs into the oven side, and a support also allows for panel mounting. The programmer can easily be moved from one oven to another.

Universal nutrition

The 24...230 VAC/DC power supply fits most installations without adaptation.

Typical applications

- Ceramic and pottery kilns, professional or amateur
- Fours for fusing and thermoforming glass
- Laboratory and testing furnaces
- Replacement of the ATR901, of which the ATR902 is the successor

Technical specifications

General characteristics

Dimensions	120 x 65 mm (front panel), depth 65 mm
Nutrition	24...230 VAC/DC ±15 %, 50/60 Hz
Consumption	4 W
Display	4 red digits 0.56 + 4 green digits 0.4 + bargraph
Materials	ABS casing, polycarbonate front panel
Weight	Approx. 550 g
Protection index	Front view IP65, enclosure and terminals IP20
Terms of use	0 to 45 °C, 35 to 95 % RH without condensation

Non-contractual document. Specifications subject to technical changes. Edition 11/2026.

Programming functions

Programs	15 cycles up to 18 segments
Segments	Rise, maintenance or descent
Regulating loops	1 loop

Accessories

Connector	7 female poles (on the side of the oven)
Assembly	Support for mounting on a panel
