Panel printer 112 mm Custom PLUS4

Embedded thermal printer for paper up to 112 mm
Adjustable guides 80 and 82.5 mm, memory 4 MB

KEY FEATURES

- Memory and integrated policies
- Simple use
- Medical version

Description

The Custom PLUS4 is the brand's first thermal printer panel that accepts 4-inch (112 mm) paper. Its adjustable internal guides also allow the use of 80 and 82.5 mm rolls.

Memory and integrated policies

Its 4MB flash memory stores logos and fonts. It integrates European, international, Nordic, Cyrillic and Chinese character sets, and prints common barcodes and QR codes.

Simple use

The semi-transparent lid allows the roller to be seen so that its replacement can be anticipated, and the opening is done with a single touch.

Medical version

Available in grey or white on request to integrate with medical equipment. A serial and parallel interface module is available as an option.

Typical applications

- Medical and laboratory equipment
- Analytical and measuring instruments
- Machines requiring wide ratios
- Fences and industrial equipment
