Custom KUBE II receipt printer

POS thermal printer 80 mm for retail and hospitality
Horizontal or vertical assembly, milling machine 2 million cuts

KEY FEATURES

- Fast and autonomous
- Designed to last
- Complete connectivity

Description

The Custom KUBE II is a POS thermal printer designed for retail and hospitality. Compact and elegant, it can be installed horizontally or vertically and fits easily into the point of sale.

Fast and autonomous

It prints tickets 80 or 82.5 mm wide at 203 dpi, with free character and graphic orientation. The large diameter roller (90 mm) reduces the frequency of paper changes.

Designed to last

The print head is guaranteed for 200 km of paper and the automatic cutter for more than 2 million cuts.

Complete connectivity

USB and RS232 or Ethernet serial interfaces, with drawer-box control. The side panels are available in several colors as an accessory.

Typical applications

- Retail trade associations
- Restaurants, bars and hotels
- Ticketing and reception
- Impressions of coupons and logos
