Description

The large 43-inch TMC430 touchscreen is distributed in Switzerland by DYNATIME SA for professional and industrial applications. It combines a resolution of 1920 x 1080 pixels and a brightness of 500 cd/m².

This large-format touchscreen draws the eye and allows for direct interaction with multiple hands. Its high brightness and VESA mount make it an ideal solution for interactive wall or floor displays.

Typical applications

- Interactive dynamic display
- Reception halls, showrooms and sales points
- Meeting and training rooms
- Plans and orientation poles

Versions and options

Version 1 (standard)	1920×1080, 500nits, HDMI, Type I, Clear glass, Black case
