KEY FEATURES

- 19-inch open frame touchscreen display
- Resolution 1280 x 1024 pixels
- Brightness 250 cd/m²
- VESA mounting and side brackets
- Power supply 12 V DC

Description

The 19-inch open frame TMO190 touchscreen is distributed in Switzerland by DYNATIME SA for professional and industrial applications. It combines a resolution of 1280 x 1024 pixels and a brightness of 250 cd/m².

Designed to be built into a machine, a kiosk or an enclosure, this open frame touchscreen is mounted without an external housing, directly behind a front panel. Its touch panel, standard video inputs and VESA or side bracket mounting make integration easy.

Typical applications

- Interactive terminals and kiosks
- Operator interfaces for machines
- Automatic dispensers and connected lockers
- OEM integration in customized equipment

Versions and options

Version 1 (standard)	1280×1024, 250nits, HDMI, VGA, DC Jack, Clear glass
Accessory	AC power cable
